

Here's what we started off with: some wood glue, a T-square and lots of cardboard.

Cutting on scrap cardboard saves your worktop from being scratched.

# *Reuse Challenge: The Cardboard Chair*

These pieces will eventually form the sides.

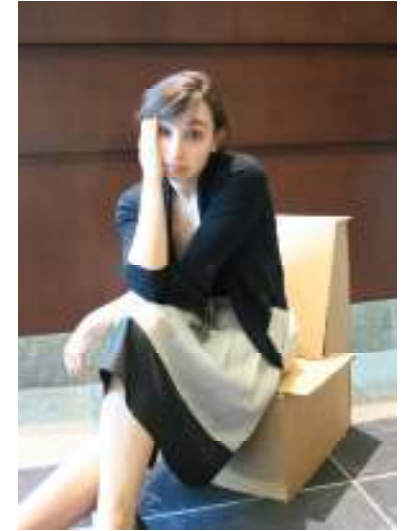

**Earth911.com**  
Making Every Day Earth Day™

All our cut pieces, and the grid is assembled.

Yay! It's finally done!

We're tired after such a long process. But hey, at least it works!

An undershot of the finished product.

*This DIY project brought to you by [Earth911.com](http://Earth911.com). Each month, we'll feature a new Reuse Challenge, where we make something from recyclable materials and challenge you to do it better! Think your project is awesome? Send us [your photos & info!](#)*
